FOR Release 5th November 2007, 09:00:

Enterprise Java specialists join as Code Generation 2008 sponsors

Enterprise Java specialists New Technology/enterprise (NT/e) have joined as Bronze sponsors of the unique Code Generation 2008 event. The company also sponsored the previous Code Generation 2007 event.

"NT/e are happy to sponsor CG2008 because it is a great meeting place for practitioners and potential users of code generation - everyone learns and

shares with enthusiasm", said Matthew Fowler of NT/e.

NT/e will present a session as part of the conference programme and will be available to discuss products and solutions based on its **JeeWiz** model-driven development system.

Code Generation 2008 brings together industry experts and leading vendors from areas such as model-driven development, software factories and domain-specific languages in a three-day event covering the practical application of code generation tools and technologies.

The event 2008 takes place in Cambridge, UK from June 25th-27th 2008. For more information visit the Code Generation 2008 web site.
